PROFESSIONAL PROJECTS

KUDO

- KUDO is a multilingual SAAS interpretation platform created by a team of passionate language and conferencing professionals. Together, we bring communication and cultural expertise from more than 21 countries.

BioMark

- BioMark is a platform that helps patients and doctors make sense of medical data to prevent and manage disease. BioMark aims towards a more personalized predictive and preventive healthcare.

Sphere

- True experts shouldn't be confined to leading academic institutions and companies. Sphere creates a new professional learning infrastructure that empowers elite knowledge transfer. Sphere cohorts are experiential, engaging and, most importantly, focused on driving results for teams and businesses on a global scale.

xquic

- Track the number of rooms you need to sell everyday to make your targeted budget. Monitor your bookings/adjustments automatically. You never have to manually reconcile again using our OTA Savings. All your revenues across your properties available at any time on any device. Track occupancy rate, ADR, RevPAR and more...

ClassCalc

- A mobile (iOS/Android) as well as a web-based application that creates a virtual classroom for students. Teachers can conduct the tests in those classrooms by blocking every other app on phone and keep their students tracked during tests.
